Energy Crisis Ecology Environmental Science Observing City Animals

Guide for Curriculum Unit 80.05.06
by Ronald J. Jakubowski

My unit involves the studying and observing of city animals. The sparrow, starling, pigeon and gray squirrel are the focus of the unit. Activities on animal observation, games involving birds and lists of teacher and student bibliographies are included. The purpose of the unit is to make inner city children more aware of their environment by giving them the opportunity to study it.

(Recommended for Science classes, 5th and 6th grade level.)
