From the Beginning: Understanding & Creating Origin Stories

Guide for Curriculum Unit 22.01.02
by Daniel Croteau

Students will be reading the core text, Matt Dembicki’s Trickster. While reading, students will examine the science in the story as well as build a stronger understanding of how setting impacts their learning and understanding. As a part of this unit, students will examine their understanding of concepts through sketchnotes. While doing so, students are asked also to consider the role oral storytelling plays in understanding a text. The culminating activity in the unit asks students to create their own story in the style of Native American origin stories.
