## Environment of Fair Haven

Guide for Curriculum Unit 79.06.03  
by David A. Cicarella

This unit is designed to contribute to a better understanding of an environment—in this case the environment of Fair Haven. The Quinnipiac River is the starting point of the project. The narrative describes how life developed in relation to the water. The three general objectives are: 1) Students will appreciate the process of community development; 2) Students will develop a sense of awareness that supersedes superficial investigation; 3) Students will increase their general knowledge of Fair Haven. Three sample lesson plans, seven suggested activities, two field trips suggestions, and bibliographies are also included.

(Designed for use in Middle School Science classes.)

### **Key Words**

*Fair Haven Ecology New Haven Connecticut*
