

The New Haven Digital Atlas:

A New Way to See the Past and Imagine the Future

a teacher workshop from New Haven Environmental History

Thursday, May 14
4:15-6:00pm
Fellows Hall (HQ 134)
320 York St, New Haven

NEW HAVEN, FROM EAST ROCK, 1853.

Come explore and discuss this exciting new teaching tool!

Transition seamlessly between how a New Haven block was mapped in 1911 and how it looks now. Layer an early plan for citywide parks atop flood zone data to see conspicuous overlaps. View a landscape or streetscape in Greater New Haven's past that you could then visit to observe its changes.

This event is open to educators at any level as well as to all interested members of the community. K-12 teachers are especially encouraged to attend.

Please bring your own laptop or tablet if you can, as this workshop will involve using a web-based application before discussing its potential for teaching.

Light refreshments will be provided.
